FINANCIAL

FINANCIAL.

Outside of the Standard Oil Company and two New York banks, Life Insurance Stock is rated at a HIGHER VALUE than any other stock known. Equitable stock, \$199 par value sold recently for \$15,000 per share; Manhattan Life has doubled 15 times; Metropolitan Life has doubled 50 times; Travelers' Life, 25 times. Union Central Life, 25 times. In 25 years the Prudentlal Life has paid in stock and cash dividends over \$3,150,90 on an original capital of \$190,000, making an average dividend of 150 per cent per annum for 25 years. Life insurance stock is more valuable than bank stock. It increases in value more readily and is far more safe. No bank could have withstood the strain of the recent insurance investigation and remained solvent, yet not one of the insurance companies failed or even became embarrassed.

An established life insurance company has allotted to me a limited amount of its stock to sell in Washington. The offering is absolutely limited in amount, as it is the policy of this company to distribute this stock in small blocks throughout the entire country, thereby increasing its friends and influence.

This stock is a 7 per cent preferred stock, and all earnings above 7 per are equally alloted to the preferred and common stockholders. Thus if company earned 20 per cent the preferred stockholders would get 13%

cent.
This stock presents a very attractive investment to those who desire abute safety and a good return income.
Write me and I will send a representative or call personally.
